PERTINENT INFORMATION

Before undertaking either the breeding of a litter or the placing of a dog at stud, each owner should study the Breed Standard, the Code of Ethics, and especially the Stud Service Certificate and the Fresh Chilled Semen sections of the *Registration Handbook*. This document must be submitted together with the Stud Dog Certificate and Litter Application.

Pertinent Information for Licensed Veterinarian

It is vitally important that the licensed veterinarian be familiar with the dogs and certain that they are the animals named on the Certificate. Therefore, the Club strongly recommends that the licensed veterinarian, whether collecting the semen from the dog, or using extended semen to inseminate the bitch, work only on dogs with which he or she has an ongoing professional relationship. The CKCSC Certified Pedigree must be presented to the licensed veterinarian, and checked against the Stud Service Certificate for Fresh Chilled Semen form for registered name, registration number, color and date of birth. The licensed veterinarian authorized to inseminate the referenced bitch must sign this Certificate, certifying the date on which the semen from the referenced dog was received and the date and location of the insemination of the referenced bitch.

(Please see back of form for additional pertinent information.)

STUD SERVICE CERTIFICATE FOR FRESH CHILLED SEMEN

Please refer to the Stud Service Certificate section of the Registration Handbook. All the conditions listed therein apply to Fresh Chilled Semen, as do those that follow.

The CKCSC will consider an application to register a litter from artificial insemination of a bitch using fresh chilled semen provided;

- 1) The semen is collected and extended by a Licensed Veterinarian.
- 2) The insemination of the bitch is performed by a Licensed Veterinarian.
- 3) The prospective litter is eligible for registration in all other respects.

Only Cavaliers registered with or eligible for registration with the CKCSC at the time of mating, shall be used for breeding. A Cavalier that has been restricted from breeding shall not be so used unless the Restriction has been lifted, prior to the breeding, by the person(s) who originally imposed it.

If either the stud dog or brood bitch is foreign born and not already registered with the CKCSC, please refer to the section in this Registration Handbook entitled Registration of a Foreign Born Dog. Eligibility for registration is the responsibility of the owners of the dog and bitch and must be established **before** the proposed breeding takes place.

The CKCSC will not register any dog using fresh chilled semen that is either sired by or out of a Cavalier owned by a person who has been suspended, expelled, or denied CKCSC privileges where the breeding date is shown to be subsequent to the date of the disciplinary action.

PROCEDURES

- 1) The owner (and co-owner, if any) of the stud dog will supply the owner of the bitch with the Stud Service Certificate For Fresh Chilled Semen form, completed correctly, signed and dated authorizing collection, and signed and dated by the Licensed Veterinarian specified to collect and extend semen. The Certificate must accompany the semen when it is shipped to the Licensed Veterinarian specified by the owner of the bitch to receive the shipment of semen.
- 2) The owner of the identified bitch (and co-owner, if any) must sign the Certificate authorizing the specified Licensed Veterinarian to inseminate the bitch with semen collected from the stud dog named on the form.
- 3) Properly signed and dated Stud Service Certificate For Fresh Chilled Semen forms must accompany the Application for Registration of a Litter form. It is the responsibility of the breeder, not the stud dog owner, to submit all documentation to the Registration Office.
